	Examiner SHAWNTINA FUQUA	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 6 and 10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6 and 10 recite the limitation "the supplementary rail" in lines 3 and 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kochman et al (US6403935) in view of O'Grady (US6814889) and Applicant's admitted prior art.

Art Unit: 3742

Kochman et al discloses a flexible semi-conductive material in sheet form (25, Figure 7B) including spaced apart first rails (10, column 10, lines 55-60) coated with tin (column 5, lines 43-52) and a supplementary rail (18, Figures 7A, 7B, column 10, line 60-column 11, line 5). Kochman et al does not disclose a nickel based antifaying compound overlying the rails, rails applied via conductive ink or screen printing. O'Grady et al discloses a nickel based antifaying compound overlying the rails, and Applicant's admitted prior art discloses rails applied via conductive ink or screen printing (specification, page 1, lines 18-27, esp. line 26). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the antifaying compound of O'Grady et al along with providing rails by screen printing of conductive ink as disclosed by Applicant in the flexible heater of Kochman et al because, a nickel based antifaying compound and providing rails by screen printing of conductive ink allows for a more secure electrical connection.

Response to Arguments

6. Applicant's arguments with respect to claims 1, and 3-10 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

7. Claim1 is allowed.

Art Unit: 3742
